

Ultra-Lath® Drainage Mat

Controls moisture, increases air circulation in exterior walls

Plastic Components' **Ultra-Lath® plastic lath** is ideal for all vertical cladding with drainage.

The **Ultra-Lath** drainage mat **creates a space between cladding and wall for increased air circulation and drainage. It controls moisture, reducing mold, mildew and dampness in the wall.**

Plus, its high compressive strength prevents crimping at fastening points, eliminating blockages.

It comes in convenient plastic strips (Strip-Lath®) for use as furring strips, and/or sheets and rolls for full coverage.

Safe and easy to use, and unaffected by salt, moisture and chemicals, heavy-duty Ultra-Lath plastic lath is self-furred and compatible with all cement-based products.

Uses

Moisture management for above or below grade exterior wall systems.

- **Non-rusting** alternative to metal laths
- 1/8" (3 mm) self-furred
- High compressive strength prevents crimping at fastening points and eliminates blockages
- Lower installed cost
- Light weight
- Cuts with a utility knife
- Safe, easy to handle
- Long, outdoor life – unaffected by sand, moisture or chemicals
- Available in strips for use as furring strips, and sheets or rolls for overall coverage
