GutterGuardPRO™

GUTTER PROTECTION SYSTEM

Durable, One-piece Construction • UV Resistant for Long Outdoor Life

GUTTER CLUTTER™ Gone!

Gutter Guard has **DOUBLE** the number of holes of other gutter protection products to allow more water to flow through.

PVC Gutter Guard Pro protects your gutters!

Prevents debris and leaf build-up in gutters. If you are frustrated from constantly climbing ladders to unclog your gutters, here is the solution! Gutter Guard Pro is designed so that the wind and rain do the cleaning for you.

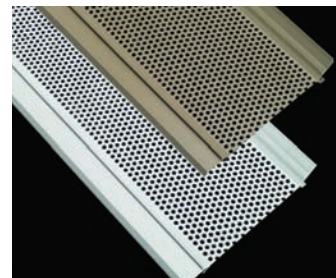

Durable and affordable one-piece construction. The simple but effective design of Gutter Guard Pro offers a sturdy and cost-effective solution in a market where complex and expensive seems to be the norm.

UV tested for long outdoor life. You can be assured of the UV resistance and durability of this product. Gutter Guard Pro is listed by Warnock-Hersey and ASTM as a product which meets or exceeds their standards in the areas of tensile and flexural strength, dimensional stability and resistance to exterior weather conditions.

Drip Edge prevents streaks on gutter face. Gutter Guard Pro's unique drip edge technology helps to prevent the dirty "tiger striping" which commonly occurs on the face of the

gutter. Deflecting dirt and debris away from the face of the gutter helps keep your home looking like new.

Fits most 5" and 6" gutter systems. Gutter Guard Pro is designed to rest on the mounting hangers of any 5- or 6-inch continuous gutter system. This allows the system to function at a consistent angle independent of the roof pitch and gutter slope. Gutter Guard Pro can also be installed along with any type of roofing materials.

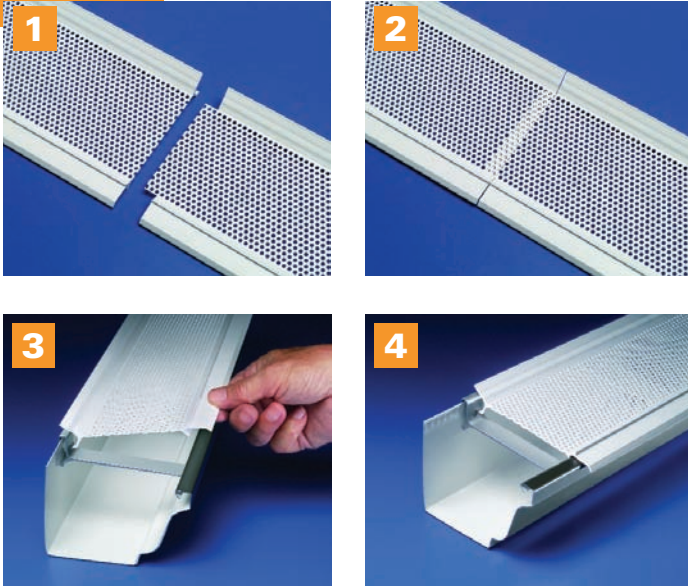

No fasteners, Snap-on/Snap-off design. Unlike other products, the unique lock-in design of Gutter Guard Pro requires no fasteners. This means that in the event that your gutters require maintenance, the system can quickly and easily be removed and reinstalled without hassle.

Avoid Gutter Clutter and get the best in Protection!

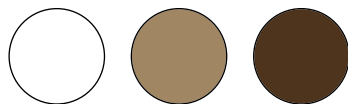

**CLASS A
Fire Rating**

*Angled
design and
drip edge on front
prevent buildup of debris
and "tiger striping" on gutters*

Gutter Guard Pro snaps in at a consistent angle – regardless of the roof pitch or gutter slope.

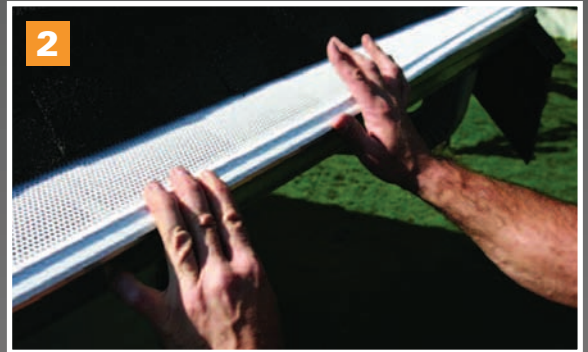

Available in three colors. Gutter Guard Pro is available in white, tan and dark brown to accommodate and blend in with the majority of your gutter color options.

Installation is a Snap!

"Gutter Guard Pro helps me get the job done right. The snap-in feature makes it easy to install and remove. The drip edge is great because it prevents staining."

– Ken Kingwell
