Application:

Flexible PVC control joint designed specifically for DEFS systems. Perforated flanges are placed on top of separated sheets of sheathing with "V" placed in separated channel. May be used in vertical or horizontal applications. Has removable tape that protects "V" groove during application; also provides a reveal. Built-in stops ensure proper thickness of base and finish.

Specification:

Control Joint with removable tape will be Plastic Components, Inc. # _____. All exterior accessories shall meet ASTM standards D1784, C1063, C1861 and D4216, shall be third party tested and Canadian Code compliant. They shall be used where specified by the design authority and installed per industry standards.

The base coat mesh should be lapped over the top of the perforated flanges and across all butt joints.
